

Map of Romania showing the location of existing and planned waste management facilities. The map is color-coded by region: green for North, yellow for Central, blue for South, and red for West. Various symbols indicate the type of facility: green diamonds for existing composting stations, yellow triangles for existing sorting stations, red squares for non-compliant landfills, blue squares for existing compliant landfills, and blue circles for existing transfer stations. The map also shows the borders of neighboring countries: Hungary to the east, Bulgaria to the south, and Serbia to the west.
